

**Liberty Ag  
Solutions**

**2022 will see  
supply and volume  
challenges not seen  
in decades.**

**Are you ready?**

Prices will increase  
across all input  
segments by  
double digits on  
some products.

Many suppliers will  
only price product at  
the time of shipping  
and this will bring  
standard retail price  
uncertainty.

The supply of key  
chemicals will be  
greatly reduced.

### **Purchasing decisions you will have to consider soon:**

- Did you buy too early or too late?
- Did you lock in all your needs?
- Do you have a PLAN B or C if your supply is cut?
- Have you looked at how to increase ROI/Bushel?
- Can you be flexible on your herbicides?
- Large farms could lose more supply vs. smaller farms.
- Who is going to be your go-to supplier for knowledge and solutions?

**Don't worry! We are here to help you make good decisions before  
the next growing season. Reach out to one of our experts today.**
