## On-Farm Tank Program

**We are launching an On-Farm Tank Storage Program for 2023**

As your supply partner, we want share efficiencies and streamline logistical challenges that not only remove delivery and supply hurdles for you, but also increase your bottom line and ROI.

### PROGRAM HIGHLIGHTS:

- Tanks are assembled with high quality and long-lasting components
- Flexible duration on contract, 2-3 years
- You receive ownership of the equipment on completion of contract
- On-Farm storage takes volatile markets and supply chain issues out of the equation
- Gives you control of when you want to buy
- We will incorporate your tank space into our volume purchases
- LAS tank monitoring ensures you will always have product ready whenever you need it
- You will have access to the best liquid blends on the market including high yield planting and foliar blends
- Our tank setups and components will be state and EPA legal, reducing your liability

## Tanks

- Poly, stainless and fiberglass tanks are available; our main focus will be poly tanks
- Choose from flat-bottom or cone tanks
- Poly tank sizes: 4,500 and 6,500 gallons; these sizes offer better flexibility on tank setups
- All fittings and hookup piping will be included
- Pump options are available
- Metering options are available for Hot Mix Systems
- It's easy to add more tanks in the future

## Tank Monitoring – VegaPuls Air 41 Sensors

- Offers real-time tank monitoring
- Utilizes radar metering and radio signaling for accuracy
- This technology will streamline our logistical inventory sharing for your operation; *Speak with your LAS Crop Consultant to hear more about this benefit*

## Containment – Affordable and Modular

- Meets state and federal requirements
- Limits your risk and liability
- Will fit any tank setup and can be changed and relocated in the future
- No concrete needed for installation
- Unit comes with a containment “bladder”

**Our On-Farm Tank Program can make your storage more efficient and lessen your delivery and supply challenges. Reach out to us and we'll provide a storage solution to benefit your operation.**
