

2022 Fall Wheat Seed Products and High Yielding Protection Products and Services.

Pioneer 26R36 Soft Red Winter Wheat. Medium-late harvest maturity

High yielding variety with good scab resistance, strong test weight, and excellent resistance to stripe rust for the Mid-South.

- Great performance in high stripe rust areas
- Racehorse in high yield environments
- Hessian fly areas will benefit from insecticide protection
- Fungicide will help control powdery mildew infections

Pioneer 26R41 Soft Red Winter Wheat. Medium-early harvest maturity

A medium-early maturity awned variety with excellent yield potential, very good test weight, and Hessian fly resistance stance for the Southeastern and Mid-South regions of the U.S.

- Racehorse in high yield environments
- Great performance in high stripe rust areas
- Great protection against Hessian fly infestations
- Fungicide will help control fusarium head blight infections

Pioneer 26R59 Soft Red Winter Wheat. Medium-early harvest maturity

High yielding awnless variety with very good resistance to stripe rust for the Southeastern and Mid-South U.S. regions.

- Racehorse in high yield environments
- Great performance in high stripe rust areas
- Fungicide will help control fusarium head blight infections
- Avoid late planting where vernalization could be limiting
- Hessian fly areas will benefit from insecticide protection

Pioneer 26R45 Soft Red Winter Wheat. Medium harvest maturity

Awnless variety with Hessian fly resistance and excellent resistance to stripe rust for the Southeastern U.S. Can also be placed in the Mid-South if scab is managed.

- Racehorse in high yield environments
- Great performance in high stripe rust areas
- Great protection against Hessian fly infestations
- Fungicide will help control fusarium head blight infections
- Avoid late planting where vernalization could be limiting

Hilliard

It is a soft red wheat that is a broadly adapted variety with high yield potential, medium stature, later heading date, and excellent straw strength.

- Hilliard is resistant to powdery mildew, Barley, and cereal Yellow Dwarf Viruses.
- Moderately resistant to leaf rust, leaf blotch caused
- Hilliard is resistant to Hessian fly Biotypes B, C, and D, but susceptible to biotype O and L

2022 Fall Wheat Seed Products and High Yielding Protection Products and Services.

Seed Treating Services

We have a state of the art loss & weight mobile seed treating unit that is fully automated.

- Bin Run Seed—let us treat your seed on-farm with commercial quality
- Our system can treat any seed from wheat, beans, corn, cotton, peanuts, and more
- ***Liberty Ag Solutions guarantees only the highest quality and coverage!***

Seed Treatment Blends

We have all the top blends and active ingredients to protect your seed and drive high yielding performance.

- Basic Fungicide blend
- Elevated Fungicide blend with broad spectrum protection
- Fungicide & Insecticide blend
- Vibrance Extreme
- Seed Coater/Polymer—for better singulation and keeping the product around the seed
